

# The **connected** advantage

## Predict. Protect. Perform.

At Fuse Fleet, we turn prediction into performance. We combine data, safety insight and claims expertise to help brokers prevent accidents, protect people and control cost. With 40 years of fleet experience, we give brokers confidence in a complex market, replacing uncertainty with data, control and long-term value.

### Underwriting with Precision

Fuse Fleet gives brokers and underwriters a clear, real-time view of how fleets operate. Every quote reflects connected, verified performance and not assumptions. This means pricing is more accurate, fair and aligned with real-world behaviour.

### Crash Probability Hub

Our Crash Probability Hub delivers a clear view of emerging fleet risk performance. It provides transparent benchmarking, insight into why performance gaps exist and tools to identify and support the highest-impact drivers.

The Hub continuously analyses trip data and driver behaviour to anticipate where incidents are most likely to occur. This intelligence helps you act early, supports safer fleet performance and enables more confident, accurate underwriting.

### Claims Expertise with Clarity and Control

Our in-house claims team combines digital efficiency with deep expertise. The Claims Portal offers 24/7 visibility from incident to resolution, accelerating settlements and supporting fairer premiums through improved claim accuracy. It gives brokers a tangible advantage with faster recoveries, fewer disputes and customers who feel supported.

### The Fuse Fleet App

Our App connects drivers, fleets and brokers in real time. It visualises driving patterns and trip data while providing actionable feedback to encourage safer habits. Each connected policy includes this capability, giving brokers visible value and customers practical tools that reinforce performance.

### The Payoff

Fuse Fleet helps brokers compete on performance, not price. Connected fleets consistently achieve:

- Smarter, more accurate pricing
- Fewer accidents
- Faster, seamless claims resolution
- Stronger customer confidence and retention

Fuse Fleet turns connection into control and intelligence into measurable performance.

## Why Fuse Fleet

Every connected fleet tells a clearer story. Fuse Fleet helps brokers deliver better outcomes with smarter premiums, faster claims and safer fleets.

It is a connected fleet insurance ecosystem built for scale, trust and performance to protect people, vehicles and the brokers who serve them.

Let's get connected!
