

Driven by **insight**

Innovative insurance, risk and claims management solutions for NDIS and community transport

FLEET INSURANCE

Tailored premiums with incentives for safer driving

CLAIMS MANAGEMENT

24/7 digital claims portal for faster, cost-efficient claims

RISK MANAGEMENT

Score risk, act and measure the result in the Crash Probability Hub

DATA ANALYTICS

AI analyses GPS data for crash probability + climate impact scores

ESG REPORTING

Access actionable ESG insights with advanced GPS data analytics

SMARTER FLEETS, SMARTER PREMIUMS

Transporting participants carries a duty of care you must evidence, not only meet. Fuse Fleet supplies the data, with AI-powered risk insights and digital claims management across your fleet.

Backed by 40 years of fleet expertise, we help National Disability Insurance Scheme (NDIS) providers and community organisations reduce incidents, support stretched teams and demonstrate proactive safety management.

The result is safer journeys for participants, less administration for your team and premiums matched to your real risk.

BENEFITS

- Demonstrate proactive risk management for NDIS Quality and Safeguards Commission requirements.
- Digital claims and real-time reporting reduce administration for stretched teams.
- Identify training needs from driver behaviour data before incidents occur.
- Fuse Fleet Coach supports safer driving on every participant trip.
- GPS data supports sustainability reporting for funding applications.
- GPS data turns fleet activity into ESG insights, cutting CO₂ and predicting crash risk.

WHY FUSE FLEET

- The Crash Probability Hub scores risk for every driver and shows which actions bring risk down.
- Log training and coaching, then measure the effect.
- Insurance, claims, risk and fleet data sit in one place, so you manage the cost of risk, not only the cover.

HOW IT WORKS

We identify the **15%** of drivers that cause **50%** of at-fault accidents before they occur.

1.

SHARE GPS DATA

2.

ANALYSE DATA

3.

CRASH PROBABILITY SCORE

4.

TARGET 15% WHO CAUSE 50% OF AT-FAULT ACCIDENTS

INTRODUCING FUSE FLEET DRIVE

Our Fuse Fleet Drive app uses pattern AI to assess crash risk and surface insights into driving habits. Drivers track performance against benchmarks and trends and lodge claims directly in the app. Real-time data feeds accurate risk assessment, turning everyday driving into intelligence for proactive claims and safer fleets.

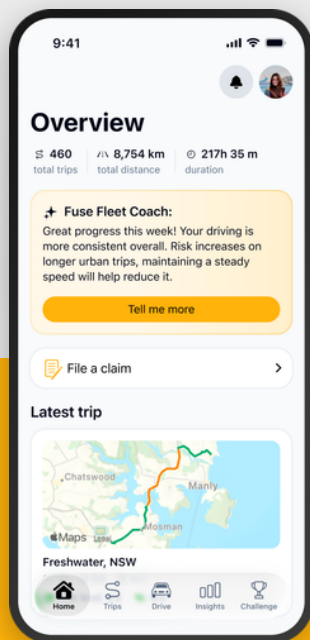

SMARTER PREMIUMS

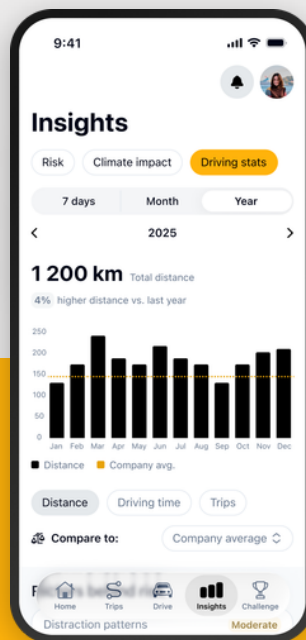

GPS data analysis produces crash probability scores for individual drivers across the fleet, so pricing reflects actual risk, not industry averages. The highest-risk drivers are identified early and targeted intervention reduces major claims by up to 20%, supporting better loss ratios and lower premiums over time.
