

FLEET RISK MANAGEMENT

Fleet **risk** intelligence

Specialist risk management,
built into your Fuse Fleet cover.

Most insurers hand you a policy. Fuse Fleet hands you a programme. Our risk management service comes with the cover, powered by real driving data, so you reduce incidents rather than only insure them.

For brokers, this is a service you bring to your customers, often charged for or left out elsewhere, and a clear point of difference at quote and renewal.

Three steps to lower fleet risk

STEP 01 Measure

WHAT IT INVOLVES

Establish your fleet's baseline risk from real driving data, set measurable targets and agree how progress is reported and to whom.

HOW FUSE SUPPORTS IT

The Crash Probability Hub scores your whole fleet and every driver, and ranks drivers from highest to lowest risk, so targets are set against real risk, not averages. We assess driving across focus, anticipation and speed control.

PRACTICAL FIRST STEP

Set your baseline fleet score, then agree a target reduction and a monthly reporting rhythm.

STEP 02 Act

WHAT IT INVOLVES

Focus effort on the drivers who carry the most risk, with interventions matched to your business, and bring managers and drivers into the loop.

HOW FUSE SUPPORTS IT

Fuse Fleet Coach turns each high-risk trip into personalised feedback, and you log training, coaching and other actions against the drivers who need them. We help you choose the interventions best suited to your fleet.

PRACTICAL FIRST STEP

Identify your highest-risk drivers this month and start with the top few, not the whole fleet.

STEP 03 Monitor and improve

WHAT IT INVOLVES

Measure whether risk actually fell after each action, keep what works, and repeat the cycle so safety improves year on year.

HOW FUSE SUPPORTS IT

The Crash Probability Hub measures driver and fleet risk before and after each intervention, so you see the effect and share the result with boards, funders and auditors.

PRACTICAL FIRST STEP

Review the score monthly, compare against your baseline and adjust the actions not reducing risk.

Why it matters

FOR BROKERS

A value-add service you deliver, not only a policy. Stronger customer conversations, stickier renewals and a clear reason to lead with Fuse.

FOR YOUR CUSTOMERS

Fewer incidents, a lower cost of risk and clear evidence of proactive safety management for boards, funders and compliance.

The Fuse Fleet advantage

- ✓ **Crash Probability Hub**, score fleet and driver risk from real driving data.
- ✓ **Fuse Fleet Coach**, targeted coaching after every trip.
- ✓ **Driver risk ranking**, see who carries the most risk, and why.
- ✓ **Measured results**, risk tracked before and after each action.
- ✓ **Digital claims**, lodged in the app and handled fast.

No telematics hardware to fit.

Request a fleet risk review

Talk to our risk team and we will show you where your fleet's risk sits today and the steps to reduce risk.
